Subject: RE: CSS AOP Planning Request

Earl,

Thanks for getting back so quickly! Just waiting for spring up here—thinking that the snow should be mostly gone from the yard by next week some time!

Ex. 5 Deliberative Process (DP)

I am not sure how already completed work will fit in—were any of these products deliverables under the previous AOP task, for example?

Over the next few weeks there will be a concerted effort to get new/anticipated products into the database/form I sent with the original email relative to additional details, etc. Will keep you in the loop as that evolves.

Looks like I will be in Durham for a SETAC PFAS meeting mid-August. You think you will be around? Maybe do some pizza together!

Gary

Gary, how are you doing up there?

Ex. 5 Deliberative Process (DP)

I can send you Justin's paper and his most recent publication if you would like it

Take Care

Earl

Subject: CSS AOP Planning Request

Hi all,

Apologies for the mass email. I am contacting you because you have been identified (by various means) as having an interest in contributing to the 8th output for CSS AOP, which currently is: "Develop AOPs relevant to human health or ecological impacts of perfluoroalkyl substances (PFAS) and evaluate applicability across species, chemical groupings, and mixtures"

As an AOP RACT member and AOP-8 lead, I need to identify those folks contributing to research products related to this output. As of now, a "product" is defined as a *single* peer-reviewed publication, database, model, method, software, or other tangible product. There will be more guidance on products shortly as we receive more direction from the NPD and other senior RAP members. For now, I need the following info from you:

- 1) Are you interested in contributing to this output?
- 2) Are there others whom I should contact that may be interested?
- 3) What product(s) do you wish to propose for this output?

This last question we can develop over the next few weeks. Initially, *I simply need a title and 2-3 sentence description of a proposed product*. Keep in mind that an investigator or product can contribute to one or more outputs. I will work with everyone to consolidate, refine, and/or house under other outputs, as needed. I am also happy to talk to anyone involved one-on-one or as a small group, as I do not know everyone's current research who has been identified here. I envision that after we have established members and draft products, we can schedule larger group meetings on a regular basis to discuss developments and research.

Please get back to me with answers to questions 1 and 2 as soon as possible. Please send me draft product descriptions no later than **COB May 6** so that I may share them with other AOP RACT members.

Thanks for your help and interest. I am excited to work with such a diverse and productive research team.

Gary Ankley
